The Power to Profit

Table Service Restaurant & Bar

Ingredient-Level Inventory Tracking

Account for every product and ingredient, down to the most granular level.

Table Layouts

Create your restaurant's table layout on the management console and track tables live.

Split Bills

Easily split tabs by number of patrons, by individual items or by different payment amounts and types.

Delivery Management

Keep tabs on every delivery order with driver monitoring and smart estimates.

Real-time Reporting

Gain insight into your restaurant's performance from anywhere. Track sales, inventory and labor data in real-time.

Always On Mode

Never lose a sale by continuing to process payments even when the Internet goes out.

Online Ordering

Reduce wait times by having customers order online in advance.

Catering Management

Manage item and order tracking, attach customer profiles and reference order history all through Revel's Catering Management.

Loyalty Programs

Create your own loyalty program based on points, visits or product purchases to keep customers coming back.

24/7 Support

Revel's 24/7 Support team will assist with any and all questions.

The Power to Profit

Quick Service Restaurant

Ingredient-Level Inventory Tracking

Account for every product and ingredient, down to the most granular level.

Combos and Modifiers

Boost revenue by adding combos and modifiers to your menu, and prompting employees to upsell.

Delivery Management

Keep tabs on every delivery order with driver monitoring and smart estimates.

Real-time Reporting

Gain insight into your business performance from anywhere. Track sales, inventory and labor data in real-time.

Always On Mode

Never lose a sale by continuing to process payments even when the Internet goes out.

Mobile Ordering

Let customers skip the line and place orders on the go from their mobile device.

Employee Management

Manage a large volume of employees and their schedule. Create roles and designate permissions for each employee.

Till Management

Auto set up tills or input tills manually, manage finances and view reports.

Customer Order Alert Screen

Keep customers up to date on the status of their order from a large digital screen.

Loyalty Programs

Create your own loyalty program based on points, visits or product purchases to keep customers coming back.

Grocery Store

Universal Barcode Scanning

Revel's POS can read any factory level barcode associated with your items. Use QR codes and existing SKUs to save time on SKU creation and inventory.

Integrated Scales

Sell items by weight with integrated scales that communicate effortlessly with the POS.

Multiple Tare Values

Manually set tare weights and include multiple tare values for a number of items.

Shipping Compliance

Revel's POS works with ShipCompliant so that you meet liquor-specific shipping regulations.

Retail Store

Enterprise Management System

Create and organize your locations by groups for maximized efficiency.

Matrix Inventory System

Easily find thousands of items by organizing them in categories. Get granular and display items by size and color in your inventory system.

Real-Time Reporting

Gain insight into your business performance from anywhere, at anytime. View data by location or across multiple locations, and track sales, inventory and labor data in real-time.

eCommerce and Online Ordering

Build an online store to increase your reach and fully customize your online presence.

Label Printing

The Revel iPad POS integrates with Zebra Label printers to print high-volume pricing labels for easy to read pricing or simply for inventory.

Always On Mode

Never lose a sale by continuing to process payments even when the Internet goes out.

Customer Relationship Management

Document customer information and use a detailed Customer Relationship Management database to understand buying preferences and build relationships.

Employee Management

Manage a large volume of employees and their schedule. Create roles and designate permissions for each employee.

Loyalty Programs

Create your own loyalty program based on points, visits or product purchases to keep customers coming back.

Gift Cards

Give customers the option to purchase and use gift cards.
