We've Got What You Need

Revel is the feature-rich POS platform designed to exceed the needs of today's hospitality and retail businesses. Since inception, we've listened to our customers by consistently delivering industry leading features, easy to use functionality, and robust integrations, all of which are created to help businesses like yours succeed. With a finger on the pulse of modern businesses, we know the needs of your industry. We understand what your business requires to be more competitive and profitable, but most importantly, we've got the tools to get you there.

We're Fast, and We're Mobile

Revel is up to 67% faster than legacy systems, enabling our clients to service their customers in a flash. Further to that, our mobility solutions provide the perfect solution for increasing the speed of service, reducing customer wait times, and boosting loyalty. Our customizable iOS App is branded exclusively with your venue's skin, and feeds orders directly from the customer's mobile device to your Revel POS, saving your customers time while increasing your profit.

We're More Than a System, We're a Platform

Revel is more than just a system; it's a true cloud-based platform that makes all merchant business data accessible to any channel at any time, giving owners and operators complete control of their business. We enable merchants to not only take payment at their store or restaurant but also offer both an online and mobile store or menu, in addition to other commerce channels. Revel includes advanced capabilities beyond payments such as eCommerce, CRM, employee management, mobile commerce, inventory management, as well as loyalty programs and gift cards. Revel offers the tools you need and the partnership integrations you want to run the business you want. The Revel platform creates a consistent and seamless customer experience.

Our Expertise is Your Advantage

We're Leaders in Innovation

Our commitment to innovation means that your business will consistently benefit from cutting-edge features and updates. Revel boasts real-time reporting, sophisticated inventory management, online ordering, loyalty capabilities, CRM, employee management, and PCI compliant cloud technology for the highest security standards. If you want to bring your own integrations, our open API means that you can integrate seamlessly with third party partners including Deputy, Tyro, Quickbooks Online, Synergy World and more to deliver a complete end-to-end solution for your business.

We understand that both time and space is a premium in the hospitality and retail industries which is why Revel is designed to be lightweight, without sacrificing any of the functionality you would expect. As an iPad-based system, Revel is a highly intuitive, robust platform with an exceptionally small IT footprint, negating the need for bulky proprietary equipment often associated with legacy POS systems. Our cloud-based architecture lets you access your data anywhere, at any time, and our Always-On Mode continues to process sales even when the internet drops out.

We're Proven

"Revel's POS provides the capabilities of a big enterprise system but is easy to use for a business owner of any size; whether it's one shop or one hundred shops."

Daniel Yuan, Branded Events Manager, **CHOBANI**

"I've worked in hospitality for about 20 years now and used lots of different Point of Sale systems. For anyone that asks, I always recommend they use Revel."

Tim Johnson, Director, CORBETT & CLAUDE

"Revel is constantly finding ways to improve the software and implement new features. They are always willing to work together to get the best outcome for our business."

Nigel Weisbaum, Sales and Marketing Manager, ARCHIE ROSE

"We like being at the forefront of technology and Revel really fits that criteria."

Clement Lee, Director, mamak
